so per cent. of the lambs marketed in trated, according to R. E. Begg, Sheep scialist for the Extension Service

Specialist for the Extension Service of Connecticut Agricultural College at Storrs. The result is a very uneven quality of market lambs.

Native lambs, uncastrated, undocked, part legg, part fat and showing no uniformity in weight, quality or condition, usually sell for from \$2.00 to \$5.00 per cwt. less than a uniform grade of western lambs, says Mr. Boar.

The custom of docking all lambs and castrating all males is almost unithe custrating all maies is almost universal in the west and it is certain that had the western flockmaster not found docking and castration of lambs highly profitable, these operations would not be so universally practiced in the great lamb producing sections.

If the industry is to be made to yield the highest returns, the docking of all lambs and the castration of all males not intended for breeding purposes should be attended to without fall at the proper time.

There is a strong market in New England during the summer for dressed lamb. The consumer usually wants hind quarters or else the chops from IMPORTANCE OF LET

DOCK ALL LAMBS

It is conservatively estimated that sold at a disadvantage. An uncastrated lamb will develop an excess of neck and fore-quarters which greatly decreases the value of the carcass. Besides the meat will have a "bucky" flavor.

HILLSIDES NEED TREES

What the trees do for the roads they do also for the forested hillsides. Wherever there are no forests on the hills and mountains the rain and melted snow rushes off in a torrendigging out great guilles and carrying away the fertile soil. Where there is a forest the trees protect the soil from the beating of the rain, the roots lead the water deep into the ground to be stored up there and gradually fed out by springs all the year round; the leaf litter absorbs and holds the water like a sponge; the trunks and roots water and bind the soil together. The forest is of the trunks and roots water and bind the soil together. The forest is of tremendous benefit in preventing both floods and drouth; it is in reality a natural storer of water. It is highly desirable, often imperative, therefore that the watersheds of navigable streams and those upon which towns, cities, irrigation projects and water power plants depend for their supply should be forested.

LETTING PIGS RUN Exercise is a prime requiste in the successful raising of young pigs. Many pigs die for tuck of it. They become so fat they can hardly waddle, and as a result contract "thumps," a disease first noted by the quick diffiand as a result contract "thumps," a disease first noted by the quick difficult breathing and a jerky movement of the flanks. Well-developed cases are incurable and whole litters are lost. Prevention is accomplished by unlimited outdoor exercise. By the time the pigs are ten days or two weeks old they should be made to take exercise, if they are not taking it naturally, and as soon as green pasture is available and weather conditions are suitable, the pigs, with the unlimited outdoor exercise. By the time the pigs are ten days or two weeks old they should be made to take exercise, if they are not taking it naturally, and as soon as green pasture is available and weather conditions are suitable, the pigs, with the dam, should be turned into a good-sized grass field, where they are close to nature. Shelter can be provided in any way a man care to construct it, so long as it shelters from the sum and rain and is dry, light and airy. Moyable hog pens are best suited to this purbose. If this exercise and green food cannot be provided, it may be necessary to cut down somewhat on the feed ration. Sods can also be thrown into the pens and the pigs in working amongst them not only get a certain amount of exercise, but a quantity of mineral matter as well.

MONEY VALUE OF BULL

This seems smail but for 300 days the increase would be 900 pounds. In a herd of ten milking cows this is an increase of 9,000 pounds of nilk per years and for the average milking life of the cows an increase of 45,000 pounds. At eight cents per quart this is an increase in returns of \$33.86 for ten cows for five years largely net.

Now what is the extra cost of a good sire? The initial cost of a good sire is about \$100.00. The interest would be \$10.00. The interest would be \$10.00. The cost of keep would be \$100.00 per year in each case; the depreciation would be \$23.00 (on three year basis) for the purse bred and practically nothing on the grade. The total cost of keeping the grade. The total cost of keeping the grade. An increase of \$38.00. An increase of \$38.00. An increase of \$38.00. An increase of \$38.00. New York, April 6.—The New York Central, Pennsylvania, Central Railroad of New Jersey and other railway lines terminating in that state have offered permanent positions as unskilled repairmen in roundhouses to unemployed former service men, it was announced tonight by the Knights of Columbus, through whose amployment service an effort will be made to recruit several hundred men. Eligible applicants will be assigned as helpers to mechanical and other ex-Minie workers, sa'd touight. He explained the operators had about considered per submission of their sintistical data and reply to the demands of the workers.

"Once we have the records filled and the proposals of the operators before us." he said, "the new agrement will be rapidly reached, unless something unforescent develops."

"Die the present the most cordial relationship is said to have existed betwent the operators and the miners and the antagonism of former conferences has failed to develop. The
danger of a deadlock or "break" is not
considered, probable, according to
those in close touch with the proceedings.

Washington. April 6.—All of South and Central America now is bound by the coverant of the League of Nations. Adhesion to the league of six more neutral states, including Venezuela, the last Latin-American country to file its notification, was reported today.

The other neutrals filing notice of adhesion are Tan Netherlands. Salvador, Morway, Denmark, and Switzerland. In recording the decision of the Norwegian government, King Haakon recited the declaration of the Storthing that "in accordance with its fraditions, it shares the great idea on which the league is based, which in its eyes represents the most considerable effort made up to the present to develop the rule of justice among nations, and that the future of the league depends essentially upon a development based on the accession of all civilized nations; a general limitation of armaments and the obligation to settle peaceably all international disputes in order to avoid war."

DYE OLD, SAABBY OR FADED FROCK

This Is Going to Be a White Season Many Dainty Novelties to Be Seen

Fashion decreed it, and if the truth be told there were few protests, when the word went round that sheer white Waistings and handsome white Skirtings would be "quite the thing" this Summer. These dainty white weaves are like a breath of the Summer we are all longing for.

SEE OUR WHITE DISPLAY-NOW

PLAIN WHITE VOILES. crisp and sheer are preeminently the best for the pretty Blouse or Summer Frock. and nothing will launder better. There is a good 40-inch Voile willing for only 89c, and in the 45-inch width we can offer two splendid values at \$1.25 and \$1.59.

VOILES IN STRIPE AND CHECK-designs are particularly pleasing as they add to the charm of the plain weave, the added daintiness of the pretty stripes and checks. We have them at 85c, 89c, and 98c, all being a yard wide.

EMBROIDERED AND LACE VOILES are simply exquisite this year. One glimpse of them and you will be planning just how the dress shall be made and anticipating your pleasure in wearing it They cannot be resisted. The width is 36 inches and we have them at \$1.10 and \$1.25. IMPORTED DOTTED SWISS at \$1.50 and \$2.00 is another dainty fabric which is proving popular. The domestic is not of such good quality, but for the children's dresses it is to be recommended. The price is 59c.

FLAXON is another white material which is attracting attention. It has the appearance of a fine linen, is 40 inches wide and in the plain sells for 65c and 69c. Striped and checked Flaxon is 32 inches wide and is priced at 59c and 89c a yard.

WHITE ORGANDIES AND DIMITIES, too, are being largely used, the Organdies particularly being favorites. These are 45 inches wide and priced at 89c, \$1.15 and \$1.25. The Dimity, with its pretty stripes and checks is only 27 inches wide and sells for 59c a yard.

WASHABLE WHITE SKIRTINGS Which Are Very Striking, at Prices Which Are Not Excessive

With linen sky-high the cotton weaves have developed, and if the truth be told there is no reason to feel sorry. The range of choice is so much wider, and the prices are so moderate. There's a handsome white Ratine, 42 inches wide at \$2.00, or a stunning Satinette in the 32-inch width for only \$1.75. There are Novelty Stripes and Checks, a yard wide, for \$1.50. There are splendid Poplins at 75c and \$1.00 a yard, and sturdy Piques for 590 and \$1.00, and last but not least, the finest bit of white Garbardine you ever saw for \$1.50.

MAKE YOUR CHOICE TODAY

and of the scrub \$195.00, a difference of \$38.00. An increased cost of \$38, therefore returned \$238 on ten daughters, most of which is clear gain. In a large herd with double the number of daughters the gain is \$677.12; with 30 daughters the gain is \$677.12; with 30 daughters the gain is \$1.015.68 and all for an initial cost of \$38.00. How can any dalryman close his eyes to this ignerat question—the Good Sire?

New Haven .- Mrs. Barbara Ploegar, known to be quite wealthy, died in New Haven Merch 9. It was supposed she left no will. This week a will was d'scovered among her effects She leaves an estate of \$150,000, made largely out of shrewd investments and
